EDUCATION

Oregon State University

June 2026

Bachelor of Science in Business Analytics – Market Research and Consumer Analytics; Minor in Music Performance Corvallis, OR

- **Relevant Coursework:** Data Analytics and Artificial Intelligence, Data Visualization and Exploration, Machine Learning and Text Mining, Integrated Marketing Analytics, Statistical Inference, Business Information Systems

EXPERIENCE

Business Transformation Intern

June 2026 – August 2026

Zinnia

Short Hills, NJ

- Conducted and synthesized industry research on **people analytics, data governance, KPI frameworks, and analytics maturity**, translating findings into recommendations for data-driven workforce strategy and management decision-making.
- Developed **people analytics standards, KPI frameworks, and data governance best practices** to improve consistency, usability, and business alignment of workforce reporting.
- Designed and developed **AI-enabled analytics agents** to automate business workflows, calculate specified people analytics metrics from source data, compare results across reporting periods, and streamline recurring management analysis.
- Analyzed workforce data applications across **attrition, management spans and layers, compensation, capacity, and performance**, translating complex analytics findings into actionable recommendations for leadership.
- Evaluated opportunities to advance organizational analytics from descriptive reporting toward **predictive and prescriptive analytics**, supporting broader people and business transformation strategy.

Co-Founder and Vice President

June 2024 – Present

Oregon Software Consulting Group

Corvallis, OR

- Led end-to-end delivery of **5+ client-facing software solutions**, translating stakeholder business challenges into requirements, project scope, technical deliverables, and implementation plans.
- Partnered with clients and cross-functional technical teams to **gather business requirements, define underlying business challenges, and translate stakeholder needs into technical solutions**.
- Managed project workflows and stakeholder communication using **Jira**, tracking requirements, deliverables, issues, and project progress to support timely execution across multiple client engagements.
- Coordinated communication between **technical and non-technical stakeholders**, providing project updates and ensuring developed solutions aligned with client requirements and business objectives.
- Developed and facilitated technical workshops and case studies, supporting **cross-training and knowledge sharing** across participants with varying levels of technical experience.

Teacher

July 2025 – September 2025

Valley Catholic Early Learning School

Beaverton, OR

- Delivered structured lessons for children ages 1–4, communicating developmental observations to support individualized learning and classroom decision-making.

Co-President

June 2024 – Present

OSU Indian Students Association

Corvallis, OR

- Spearheaded strategy and operations across **finance, marketing, partnerships, and event planning** for a 500+ member organization, coordinating 30+ volunteers and managing a **\$10K+ event budget**.
- Organized and executed India Night, OSU's largest cultural event attracting **1,000+ attendees**, coordinating logistics, vendors, entertainment, volunteers, and cross-functional stakeholders.
- Cultivated partnerships with student organizations, university administrators, and local businesses while using attendance, engagement, financial, and outreach information to guide planning and resource allocation.

ANALYTICS PROJECTS

Spotify Music Popularity and Listener Insights

March 2025 – June 2025

Python, pandas, Statistical Analysis

- Analyzed **5,000+ Spotify tracks** using Python and pandas to identify relationships between audio features and song popularity; built predictive, statistical, and visualization models to uncover potential drivers of listener engagement.

Detecting Fake 5-Star Yelp Reviews

April 2025 – June 2025

Python, NLP, Machine Learning

- Developed an end-to-end **machine learning and NLP pipeline** using sentiment analysis, LDA topic modeling, K-Means clustering, and logistic regression to identify potentially fraudulent reviews, achieving **99% model accuracy**.
